

Advanced Apex Project-2

Week-2 Project Outline Template

Students are strongly encouraged to include markdown explanations, observations, and interpretations between code cells to improve readability, reproducibility, and AI-assisted evaluation quality.

1. Problem Statement & Business Goal

Explain the selected problem statement and objective.

2. Dataset Details

Provide dataset source, target variable, important features, and dataset size.

3. Initial Dataset Understanding

Mention initial observations and expected challenges.

4. Proposed Workflow

Mention DPP, EDA, FE, modelling, tuning, and evaluation workflow.

5. Proposed Baseline & Advanced Models

Mention baseline model and comparison models.

6. Evaluation Metrics & Tuning Plan

Mention evaluation metrics and tuning approach.

7. Tools & Technologies

Mention Python libraries/frameworks/tools.

8. References

Provide references and dataset links.
